U. S. Government  
Washington, D. C.

ATT: [REDACTED]

SUBJECT: Microscope Bases.

Gentlemen:

This will confirm our recent verbal interchanges concerning the Model LB-46 Microscope Base.

STATOTHR

STATOTHR

The [REDACTED] proposes to furnish Model LB-46 Microscope Bases modified to place the upright post mounted 1½" to the rear and 3/4" to the right of the location on the standard base. We further propose to add a snap ring device to limit the down-travel of the B & L #537002 Steroscope to prevent contact between the rhomboid arms and the stage glass. The microscope mounting arm will be collimated to the stage. The difference in your cost between the proposed Model LB-46 Microscope Base, Cat. #910539 is a reduction of \$51.25 each as compared to the B & L base with the double rack and pinion arrangement for a total savings to you of \$1,281.25.

If there are any other questions concerning this matter please do not hesitate to contact us at your convenience.

STATOTHR

Very truly yours,

STATOTHR

[REDACTED]  
Vice President
